

Forward & Backward Pass manual

calculation example with one neuron & Actⁿ funⁿ. & multiple input & weight -

$x_1, x_2, w_1, w_2, b, \tanh$ (given)

$$\begin{aligned}x_1 w_1 &= x_1 * w_1 \\x_2 w_2 &= x_2 * w_2 \\x_1 w_1 + x_2 w_2 &= x_1 w_1 + x_2 w_2 \\n &= x_1 w_1 + x_2 w_2 + b \\L &= n * \tanh()\end{aligned}$$

→ Forward Pass
